

# Soil Health Cover Crop Initiative Workshop

Join us on Wednesday, December 12, 2018, at 9:00 AM at the Beaufort County Agricultural Center for a Cover Crop Workshop with presentations on soil health and cover crop management, and a discussion of last year's cover crop versus this year's cover crop. Also, we will have an optional field visit after the workshop to view the progress of this year's multi-species cover crop.

Lunch will be provided. Please call the Beaufort Soil and Water District at 252-946-4989 by Friday, December 7, 2018, to RSVP.

Total approximate field acreage of demonstration plot is 14 acres. Alternating 40-foot wide strips of a multi-species cover crop mixture and control strips with no cover were planted.  
Author: Chris Santelle  
Date Created: 2/16/2018  
Multi-species cover crop mixture includes Abruzzi Rye, Crimson Clover, Austrian Winter Peas, and Tillage Radish.
