Types of Agricultural Easements

Different Easements – Different Purposes

• Protect Farmland and Agricultural Uses
  – Agricultural Land Easements (ALE) {USDA-NRCS}
  – Agricultural Development and Farmland Preservation Trust Fund (ADFPTF) {NCDA&CS}

• Protect and Restore Drained Wetlands
  – Wetland Reserve Easement (WRE) {USDA-NRCS}

• Protect Stream Buffers
  – Conservation Reserve Enhancement program (CREP) {USDA-FSA/NCDA&CS-Division of S&W}
Know Your Choices

• Perpetual Conservation Easement
  – Most common
  – USDA, Military, and ADFP Trust Fund

• Term Conservation Easement
  – Currently available only with ADFP Trust Fund

• Conservation Agreements
  – Voluntary Agricultural Districts
  – Enhanced Voluntary Agricultural Districts
  – Other programs under development
An agricultural conservation easement is a legal tool that restricts residential, commercial, and industrial development of land to maintain its agricultural production capability.

The purpose of these easements is to ensure the land remains in agricultural, horticultural, or forestry production.

The conservation easement is recorded in the records of the Register of Deeds office in the county in which the property is located.

The conservation easement “runs with the land,” meaning the terms and conditions stay with the land as it is transferred to buyers or heirs of the landowner.

The easement is “held” by the applicant organization, which can be a local nonprofit conservation organization or a county government, to ensure compliance with its terms and conditions.

Authority for these conservation easements is found in N.C.G.S. 106-744.

Before the Application Process

• Is my property eligible?
  – The property must be privately-owned
  – Located within the borders of the State of North Carolina
  – In working lands use (agriculture, horticulture, forestry).
  – Minimum acreage requirements should follow the present-use value guidelines:
    • Five acres for horticulture
    • 10 acres for agriculture (row crops or pasture)
    • 20 acres for forestry
    • A combination of working lands use
Before the Application Process

• Assess your Conservation Priorities
  – What are your future plans? What are your ultimate objectives?
    • Agricultural, horticultural, and forestry
    • Environmental benefits
    • Short and long-term financial benefits
    • Public benefits
    • Family and community heritage

• Conversations with partners and potential heirs and buyers
  – Is there an agreement? Shared vision?
    • Ultimately, it is the decision of the current landowners
“Will I receive money for placing my farmland under a conservation easement?”

• Yes. If awarded a grant in which the application requests funds for the easement purchase value, you will be compensated for the purchase of the development rights.

• Any amount of money you may receive for your easement purchase value (i.e., selling the development rights of your farmland) will be determined by appraised values of the property and funds in the contract budget.
How is an agricultural easement on farmland valued?

• Based on an appraisal.
  – The appraisal is a Before and After.
  – The appraisal provides the market value of the easement property before the easement is placed and the market value of the easement parcel after the easement is placed.
  – The difference of the two values is the effect of the easement on the offered (easement) property. This the value of the easement.
